

## INSTRUCTION FOR THE DESIGN OF ARTICLES

All articles should be submitted in WORD format using TimesNewRoman 12 font, after 1 interval with 2 cm margins on all sides.

General requirements:

### 1. Title page

The title page contains the title of the article, the data (name, place of work, position) of all participants, designated as the author with an indication of the place of work. The author's data for contacting the editorial office, as well as the postal address, telephone number, e-mail address must be shown at the bottom of the title page. The title page is issued in Kazakh, Russian and English.

### 2. Abstraction

The volume of the abstract should not exceed 300 words. The abstract of the original articles has a purpose, methods, results, conclusions and keywords. The abstract of review articles and descriptions of clinical cases is made in the form of a single paragraph that contains information about the relevance of the selected topic. Abbreviated words should not be used in an abstract. When choosing keywords, authors should strictly use medical subject headings (MeSH) and IndexMedicus list.

Abstract is made in Kazakh, Russian and English.

### 3. The text of the article

The text of the original article should include sections as introduction, materials and methods, results, discussion, conclusions and bibliography.

In the introduction, the essence and purpose of the research should be clearly defined. This section should provide the prerequisites for research. It is necessary to justify and indicate specific goals or the hypothesis of the study.

Materials and methods: they should include the design of the study, the description of the participants or the type of material used in the work, a description of all the activities carried out and the type of statistical analysis. In this section, the author must declare that this research is consistent with basic ethical principles for conducting clinical trials.

Results: This section should describe the findings and results of statistical analysis. The results should be presented in a logical sequence in the form of text, tables and / or figures.

Discussion: This section should include an interpretation of the results of the study. These data should be discussed in the context of the results of other studies described in the literature.

Conclusions: Conclusions should be related to the objectives of the study and drawn up in a single paragraph. Conclusions should not contain unqualified statements and conclusions, which are not confirmed by the data you received.

The text of the review articles has an introduction, the main part structured into subsections with titles and conclusions.

The text of the description of the clinical case contains an introduction, presentation of the case with illustrations, discussion and conclusions.

### 4. Bibliography.

The list of references should be shown on a separate sheet with a double interval. The literature used must be successively numbered in Arabic numerals [in square brackets] in the order in which it was first mentioned in the text. The reference number must be placed at the end of the sentence before the dot. The link should contain the following information: authors, article title, journal title, year, volume, first and last pages of the article.

### 5. Tables

Tables should be printed on a separate sheet with a double interval. Each table should contain the name and numbering of the table in the order in which it is first mentioned in the text. All abbreviations used in the table should be listed in alphabetical order in the explanation of the table (eg, HBV-viral hepatitis B).

#### 6. Drawings

Figures should also be named and numbered. The drawings should be clear and present at least 300 dots per inch (DPI) in JPEG format.

#### INSTRUCTION FOR THE FORMATION OF THE ABSTRACT

All abstracts should be submitted in WORD format using the TimesNewRoman 12 font, after 1 interval with 2 cm margins on all sides

The number of characters can not exceed 2700 characters, including spaces.

#### General requirements:

The title must have: the name (capital letters are allowed in the acronyms and in the first word of the title); surnames and initials of authors; from a new line - an institution, a city.

The content of the abstract should reflect: the purpose of the work, the material and methods of research, research results, conclusion, key words (5-6).

In the text of the theses are not allowed: references to literature sources, abstracts with trade names of preparations, tables and figures are not included. Abbreviations of words and terms in the title of abstracts are not allowed

Each file should include: one abstract, the file name is given by the surname of the first author and the number of the abstract(if the author presents several abstracts).
